

Software Requirements Specification (SRS)

TaskReward — Gamified Productivity System

Project Overview:

TaskReward is a gamified productivity web application designed for students and professionals. The system allows users to create tasks, complete them, earn points, unlock achievements, track progress, and improve productivity using a game-inspired reward system.

1. Purpose

The purpose of this system is to increase user productivity by transforming task management into an engaging and rewarding experience.

2. Scope

The application provides task creation, task completion tracking, point rewards, level progression, badges, history tracking, and user statistics.

3. Technologies Used

Frontend: HTML5, CSS3, JavaScript

Storage: Browser LocalStorage

UI Features: Animations, responsive design, gamification system

4. Functional Requirements

- User Login System
- Create Tasks
- Delete Tasks
- Mark Tasks as Completed
- Reward Point System
- Badge Achievement System
- Level Progression
- Dashboard Analytics
- Productivity Statistics
- History Tracking
- Persistent Storage using LocalStorage

5. Non-Functional Requirements

- Responsive UI Design
- Fast Performance
- User-Friendly Interface
- Smooth Animations
- Secure Client-Side Data Handling
- Cross-browser Compatibility

6. System Modules

Authentication Module: Handles user login and profile loading.

Task Management Module: Creates, updates, filters, and deletes tasks.

Gamification Module: Handles XP, points, levels, streaks, and badges.

Dashboard Module: Displays statistics and quick insights.

History Module: Stores completed task records.

7. Database / Storage Structure

User Data Stored:

- Name

- Total Points
- Tasks Completed
- Badge List
- Task History
- Streak Information

Task Data Stored:

- Task ID

- Task Name
- Description
- Priority
- Deadline
- Points
- Completion Status

8. User Interface Features

- Modern dark-themed UI
- Sidebar navigation
- Animated cards and modals
- Reward popup system
- Toast notifications
- Responsive layouts for mobile devices

9. Future Improvements

- Backend database integration
- Cloud synchronization
- Team collaboration features
- Daily challenges
- Calendar integration
- AI productivity assistant

10. Conclusion

TaskReward combines productivity management with gamification techniques to improve motivation, consistency, and task completion rates.

11. Feature Summary Table

Feature	Description
Task Creation	Users can add tasks with priority and deadlines
Rewards	Points are awarded after task completion
Badges	Achievements unlock automatically
History	Completed tasks are stored for tracking
Profile	Displays productivity statistics and progress
